PROJECTS

TechBlog

<https://github.com/chergul/tech-blog> | <https://thawing-ocean-97036.herokuapp.com/>

- **Summary:** *The application contained within is a CMS-style blog site similar to a WordPress website. You can publish your blog posts and comment on other user's posts as well. The app follows the MVC paradigm in its architectural structure.*
- **Role:** *Full-stack Web Developer*
- **Tools:** *Handlebars.js as the templating language, Sequelize, and express-session npm.*

Appointment Manager

<https://github.com/chergul/appointment-manager> | <https://fathomless-eyrie-79379.herokuapp.com/>

- **Summary:** *Lady Lash is a small business, run by only one person. All the appointment booking, cancellations, and price negotiations are handled via Instagram, which leads to late replies, double bookings, upset customers, and cancellations.*
- **Role:** *Front-end and also JQuery for the appointment part.*
- **Tools:** *JavaScript, JQuery, HTML, CSS, and Handlebars*

CERN Shiftrack

<https://github.com/cherkul/appointment-manager> |

<https://fathomless-eyrie-79379.herokuapp.com/>

- **Summary:** Employers can track the employee's working hours and at the same time can make a schedule and post it. Besides that, employees can request time off requests and employers can make a schedule accordingly.
- **Role:** Front end and Back end
- **Tools:** React.js, GraphQL, Apollo Server, React-Big-Calendar, MongoDB

EXPERIENCE

Hergul Law, Istanbul/Turkey - Attorney at Law

June 2013 - PRESENT

- Handled over 300 real estate and criminal cases in 5 years, resulting in improved jurisprudence decisions and new law articles.
- Developed strategies to resolve cases in the client's best interest.

Ceyda Hergul, Fort Lauderdale, FL - Freelance Developer

June 2019 - PRESENT

- Helped my friend's with their blogs and I made their websites more splendiferous so they gained more visitors and followers.
- Worked for Shopify platform for companies so they became really successful selling their products online. They made new customers. Especially in the Covid Time they had to close their stores so they made 12% sales through e-commerce platforms.
- Created some useful apps and deployed them on GitHub for self-learning
